IAIME MedicoLegal Institute: The Science, Art and Practice of Medical Evaluation – Needs and Objectives

The education, training and skill set required for independent medical evaluating physicians exceeds that required for treating physicians resulting in a learning gap, which, if not addressed, will lead to poor results for injured or ill persons and all other stakeholders. IAIME's 'The Science, Art and Practice of Medical Evaluation' is designed to:

1. Understand the various nuances of different examinations to assert injury, impairment and disability (workers comp, social security, personal injury, federal jurisdictions)
2. Identify the complexity of concussion medical conditions. Various approaches to examination, determination of injury and appropriate treatments
3. Understand the appropriate imaging studies for the evaluation of spinal disorders. There should be increased skill in interpretation of such imaging and applications to the medical condition
4. Understand the role for ESI in the treatment regimen of spinal disorders
5. Understand thought processes in determining the causation of an industrial injury

IAIME Annual Scientific Session – Needs and Objectives

The focus of IAIME's 33rd Annual meeting is on evidence-based knowledge, techniques and procedures that enhance independent medical evaluation, injury prevention and injury treatment. The education, training and skill set required for independent medical evaluation exceeds that required in the clinical setting resulting in a learning gap, which, if not addressed, will lead to poor results for injured or ill persons and for all other stakeholders. The objective of IAIME's 33rd Annual meeting is to close this gap and to provide independent medical evaluators with the knowledge and tools to enhance practice performance and to improve outcomes for injured persons and other stakeholders by:

1. Application of EBM principles in treatment and evaluation of injured persons
2. Better understanding principles of causation in disease and injury
3. Enhancing report writing skills
4. Improving deposition and testimony skills
5. Understanding implications of cultural differences

CERTIFICATIONS FOR IAIME MEMBERS

IAIME CERTIFICATIONS

There is a certification being offered by IAIME. The CMLE certification replaces the previously earned CEDIR certification for all individuals who wish to certify in the area of MedicoLegal Evaluation. The individual that passes the CMLE® exam will receive the IAIME designation of “Certified MedicoLegal Evaluator” (CMLE®). The materials required to pass the 100-question exam are made available through the IAIME organization in conjunction with the AMA Guides 4th, 5th, 6th Editions. All future IAIME Review Courses will support this new examination. Added credentials (4th, 5th, 6th Guides) are available to those receiving their CMLE® certification by way of an additional (brief) exam. This will be made available for each additional edition for which an individual desires further qualification. Additional credentials (adding the 4th, 5th, or 6th to current credentials) will require additional fee payments. Existing CEDIR holders will be grandfathered with CMLE® credentials, valid through January 2021. If you wish to receive an updated CMLE® certificate (PDF) to replace your CEDIR certificate, visit www.iaime.org/certification to submit a request for an updated certificate. Certificates will be issued within 30 days after receipt of the completed request.
